- Graph paper
- Highlighters

Course Description

This class is for the seventh grader who needs a solid course in the basics. It covers percentages, basic geometry, measurement conversions, probability, statistics, graphing, and some pre-algebra. This class will help solidify math skills. Assignments will be posted in Jupiter Ed.

8th graders who need practice with basic arithmetic may enroll in this class. Please check the syllabus for more detailed information.

ATTENTION: Summer homework is required. It will be assigned in early August and will need to be completed by the first day of class.

To be successful in this class:

Students must participate in classroom activities, follow classroom procedures, and complete at-home assignments accurately and on time. Throughout the co-op week, students will be assigned 4-5 days of homework with each day requiring 45 minutes to an hour for total of approximately 4 hours of homework each week.

Summer and Christmas break homework will be assigned and is required.

Parents must be involved at home on a daily basis, own the solutions key, reteach/review, check, and correct daily homework.

2nd Hour - Dunbar

Meet Mary Dunbar
