Other Materials:

- Sharpened pencils with erasers
- Colored pencils
- Calculator, scientific (teacher recommends this one [HERE](#)).
- Highlighters

- Fine tip whiteboard markers (EXPO preferred)

Course Description

This class is for middle schoolers who needs a solid course in the basics. It covers number sense, algebraic expressions, equations & inequalities, ratio, proportions & percentages, functions & graphing, an introduction to geometry, measurement (area & volume), and probability & statistics. This class will help solidify math skills and works well for anyone taking Math 8 the following year. Assignments will be posted in Jupiter Ed.

The curriculum is intended for 7th grade students or advanced 6th graders as well as 8th graders who need practice with basic arithmetic.

ATTENTION: Summer homework is required. It will be assigned in early August and will need to be completed by the first day of class.

To be successful in this class:

Students must participate in classroom activities, follow classroom procedures, and complete at-home assignments accurately and on time. Throughout the co-op week, students will be assigned 3-4 days of homework with each day requiring 30-45 minutes for total of approximately 4 hours of homework each week.

Summer and early December homework will be assigned and is required.

Parents must be involved at home on a daily basis, and use the answer key, reteach/review, check, and correct daily homework.
